

Solid and Corrugated Plastic Divider Sheets Protect Products Throughout the Supply Chain

ORBIS solid and corrugated plastic divider sheets provide maximum product protection and load stability for unitized loads of beverage, food and industrial products. When combined with plastic pallets and top frames, an efficient shipping system is created for storage and transport.

These reusable plastic Divider Sheets are placed between layers of aluminum, steel, glass and plastic cans or bottles used to package food and beverage products. They are also used in many industrial applications to protect items including food, beverage or automotive products.

The non-sloughing design reduces product contamination that can occur from dust, fibers and splinters found in alternative sheet materials. Additionally, Divider Sheets are easily to clean using ORBIS' proprietary cleaning technologies.

To support high-velocity supply chains, ORBIS offers Divider Sheets on a rental basis, through its pooling services. Pooling eliminates the upfront investment of purchasing divider sheets. ORBIS specializes in managing the complexities of transporting and tracking these pooled products.

Industries:

- Beverage
- Food distribution (meat, produce, etc.)
- Consumer goods
- Printing
- Industrial

Typical Sheet Sizes

44" x 56"
40" x 48"
44.75" x 47.5"
45" x 47.5"
1100 x 1200 (mm)
1120 x 1300 (mm)
1120 x 1420 (mm)
1150 x 1250 (mm)
1180 x 1250 (mm)
1200 x 1350 (mm)
Custom Sizes Available

ORBIS is North America's leader in reusable packaging. Plastic reusable packaging improves the flow of product all along the supply chain, to reduce total costs and drive sustainability. ORBIS uses proven expertise, industry-leading knowledge and superior products to create reusable packaging systems that help world-class companies move their products faster, safer and more cost effectively. Call ORBIS today to learn more.

Thickness from 0.025" to 0.180" (0.64mm to 4.57mm)

Smooth, solid, no-slip design

Consistent dimensions for use with automated systems

Available in custom sizes and colors

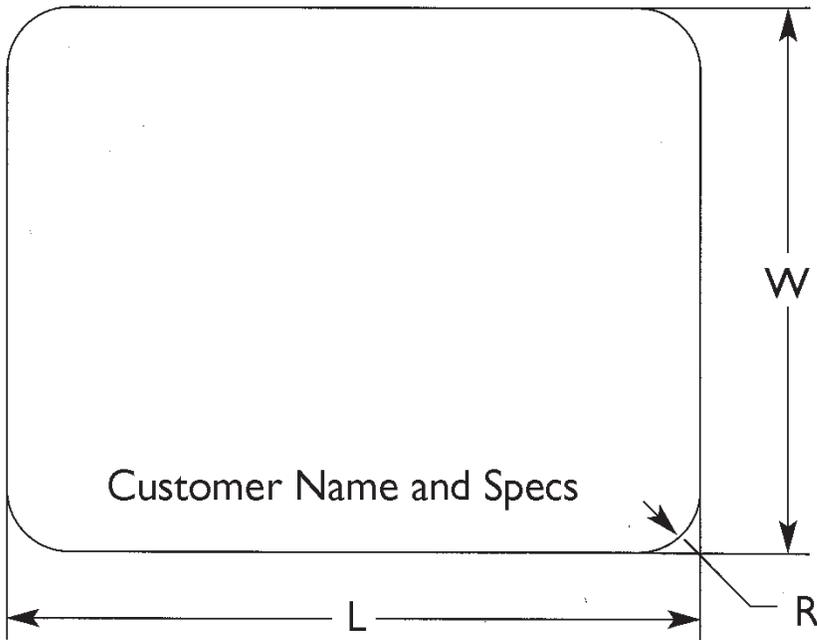

Sheets available in solid or corrugated

Rounded corners, R2.0" (51mm) radius or custom radius

(Pictured: Solid Sheets)

Customer name, bar codes and other specifications can be printed on sheets

Technical Specifications

- Chemical Resistance: Resistant to water based solutions of inorganic salts and to almost all inorganic acids and bases
- Electrical Characteristics: Surface resistance > 1.014 Ohm, static free
- Sanitary and Hygienic Characteristics: Conform to European and North American regulations concerning plastic in contact with foodstuffs
- Temperature Range: 0°F to 176°F (-17.8°C to 80°C), subject to application characteristics
